Luis Miguel Benico luismiguelbenico@gmail.com | +63 962 540 3062 | Zaragoza, Nueva Ecija, PH | LinkedIn

- **Full Stack Web Developer** experienced in software development, web systems, and database-driven applications. Skilled in JavaScript, TypeScript, React, Node.js, Express, PostgreSQL, MySQL, and cloud deployment platforms, with a strong interest in backend development, API design, and scalable systems

SKILLS

- **Frontend:** React.js, Next.js, Tailwind CSS, React Native (Expo)
- **Backend:** Node.js, Express, Laravel, PHP
- **Database and Cloud:** MySQL, PostgreSQL, Supabase, Railway
- **API and Integrations:** RESTful API Development, Websockets, OpenAI API, Gemini API
- **Tools and Platforms:** Git, Github, Postman, Vercel, Render, GCP, Wordpress, Claude, Codex
- **Soft Skills:** Time Management, Adaptability, Communication, Continuous Learning, Reliability, Attention to Detail, Patience

EXPERIENCE

Full-Stack Developer / Team Lead Intern - Techstacks PH **Jan 2026 to May 2026**

- Maintained and improved existing application workflows by debugging **frontend, backend, UI, API, and data-handling issues** across web and mobile-related modules.
- Investigated reported issues through **UI testing, API response validation, database record checking, and workflow review** to identify root causes.
- **Led a team of 6 developers** by assigning tasks, monitoring progress, clarifying requirements, coordinating **Git branching workflows**, and organizing feature implementation, debugging priorities, and system improvements.

Technologies: Next.js, Express.js, React.js, Gatsby.js, Svelte, WordPress, HTML, TailwindCSS, GitHub, Docker, Jira

Full-Stack Developer - Freelancing **June 2026 to Present**

- Troubleshooting and resolving production bugs, API issues, authentication problems, validation errors, UI inconsistencies, and other application issues to improve reliability and user experience.
- Optimized website performance and **Core Web Vitals (LCP, CLS, INP)** through lazy loading, code splitting, API response optimization, improved loading states, and reduced unnecessary client-side operations, achieving **up to 30% faster page performance**.
- Improved technical SEO through **Google Search Console fixes, metadata optimization, indexing improvements, and Lighthouse recommendations**, while addressing accessibility and best-practice issues.
- Refactored legacy and poorly structured code while improving **error handling, logging, input validation, and authentication** to enhance maintainability, security, and application stability.

Technologies: TypeScript, JavaScript, React.js, Luau, Python, Node.js, Express.js, TailwindCSS, Jira, Github, OpenAI API, Codex, ChatGPT, Supabase, PostgreSQL, Roblox Studio, Blender, Vercel

PROJECTS

Centralized Web-Based Hospital Outpatient System (Capstone) - Full-Stack Developer **Dec 2025 to Mar 2026**

- Architected and developed a **centralized, role-based outpatient management system** covering the full patient workflow—from appointment booking and approval to real-time queue management, consultations, prescriptions, laboratory results, billing, notifications, and audit logging.
- Built secure, modular **backend APIs and responsive dashboards** using Node.js, Express.js, React.js, and PostgreSQL, implementing authentication, role-based authorization, request validation, structured error handling, and real-time operational workflows for patients, doctors, secretaries, and administrators.

Technologies: TypeScript, React.js, Express.js, TailwindCSS, TypeORM, PostgreSQL, Git, GitHub, Cloudinary, Twilio, NodeMailer, Docker, Railway, Vercel

Project Scaffolding CLI - Forge - Full–Stack Developer **Sept 2026 to Present**

- Designed and developed a **cross-stack developer CLI** that automates **project scaffolding, environment setup, and reusable feature installation** across multiple programming languages and frameworks.
- Built a **modular boilerplate and dependency resolution system** with **prerequisite validation, project detection, and installation state tracking** through .forge.json.
- Engineered extensible workflows including ***forge new***, ***forge add***, and ***forge doctor***, with **automatic dependency installation, compatibility checks, and diagnostic tooling** designed to support an expanding ecosystem of stacks, templates, and integrations.

Technologies: TypeScript, Node.js, Commander.js, Inquirer, Chalk, Git, GitHub, npm, React, Vite, Tailwind CSS, Supabase, Zustand, TanStack Query

EDUCATION

College of the Immaculate Conception **Sep 2022 - Apr 2026**

BSIT - Cumulative GWA: 1.50 (Consistent Dean's Lister) Sumacab Este, Cabanatuan City
